Premium Fiberglass doors and insert frames capture the true grain detail with a patented silicone casting with a unique nickle vapor deposition technology. This technology produces the most authentic look and feel of real wood grains in fiberglass doors. Our premium fiberglass doors are available in three wood grain textures including Cherry, Mahogany and Oak. Each finished door is also available with a "Distressed" look. Four series of doors are offered (see next page for details) with composite or wood prehung frames. Multi-Pointe hardware is also available.
