Fypon® Stone & Timber

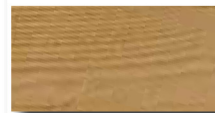

In this Issue ...
Product Updates -
page 2-

A new line of products from Fypon® – Stone & Timber – features stone-surround systems for windows that will give you the versatile, textured finishing touches you and your customers seek for any project. Authentic-looking and maintenance-free for years, the line includes a wide selection of pot shelves, flat block sills, arched blocks and keystones that provide the look and feel of real stone architectural details. The high-performance polyurethane accents, which offer uniformity and consistency, are major design differentiators for existing and new buildings. All Fypon® stone-surround products are a plus on projects because they are lightweight, easy to handle and install without intensive labor.

Product Details

- Products are for decorative purposes only.
- All Stone & Timber products are factory-primed with an oatmeal primer (unless otherwise noted) and are ready to be stained or painted.
- All Stone & Timber products feature a realistic wood grain or stone texture on all visible (installed) surfaces. Because many of these products have been moulded from real wood or concrete elements, the depth and pattern of the texture may vary slightly from category to category.

Schlage Update

Birmingham Lever (F-Series)

This new lever features a distinctive style that harkens back to the Colonial era. The Birmingham lever can be paired with any of Schlage's Decorative Collections products, offering enough combinations to complement any architectural design.

- Certified ANSI/BHMA Grade 2 lever
- Limited lifetime mechanical and finish warranty
- Non-handed lever design
- Easy installation with screws self-aligning to mounting posts
- Complies with ADA accessible guidelines
- Available in Satin Nickel (619), Bright Chrome (625), and Aged Bronze (716)

New Schlage Handleset Designs

Brookshire and Wakefield Handlesets (F-Series)

In an effort to continue to provide new designs to further round out our portfolio of handlesets, we are happy to announce two new F-Series handleset models. Both of these two new handleset families also suite with Schlage's Wakefield and Brookshire Decorative Collections products. Brookshire (BRK) - The Brookshire grip was designed as a more decorative offering within the Schlage F Series line. This handleset features a grade 1 deadbolt, adjustable through-bolt, suites with a variety of scroll plumbing and lighting designs, and suites extremely well with our Flair lever.

Wakefield (WKF) - The Wakefield handleset is a new F-Series design that was formerly offered in Schlage's FA Series line. Designed with beveled lines around all sides, this handleset features a grade 1 deadbolt and adjustable through-bolt. This handleset is an upgrade complement to the Schlage F Series Plymouth grip handleset and suites very well with the Accent lever.

Hopper and Custom Wood Tilt and Turn Windows

Hopper (rendering is for demonstration purposes only - actual product may vary)

JELD-WEN offers a true Hopper window in their Tilt & Turn offering. The Hopper window is a compliment window to the Tilt & Turn that opens only one way, inward from the top for added ventilation applications. Many projects call for a Hopper window in an area that requires a wider window and they can achieve these demands in a couple of size configurations. The Hopper can be ordered up to a 72" x 32" or 64" x 48". A Hopper comes with a DP 65 rating on sizes up to 32" in height and a DP 50 on sizes taller, up to 48".

The JELD-WEN Tilt & Turn window has created a great deal of interest in the market and a desire for larger sizes with exceptional performance ratings. JELD-WEN is able to offer a Custom Clad Tilt & Turn window up to 60" x 72" with a DP 50 rating.
