### *Pre-Assembled Pocket Door Frames*

Fully assembled for quick and easy installation. Designed to hold up to 150 lbs.

Pocket Door Frames provide a space saving alternative to traditional swinging doors. Gain full use of your door opening space while providing privacy for your bathroom, closet or utility room. Swinging doors and bifolds project into your room and limit walking space. Accordion doors reduce your door opening width. Pocket doors solve these problems and allow you to utilize all of your wall space for furniture or cabinets.

Installation is quick, approximately 20 minutes, and requires basic tools.

#### **Many options are available to customize your Pocket Door Frames.**

- Frames built for 1-3/4" thick doors.
- Frames for up to 4/0 wide doors and heights up to 8/0 feet.
- Frames built for 2x6 studs.
- Frames built with hardwood fascias such as Red Oak, Poplar, Cherry, Maple and more.
- Heavy weight hardware for doors up to 250 lbs.
- Special Pocket frames head for double door openings.
- V-groove jump proof track
- Passage and Privacy Pocket door locks in all popular finishes.
- Pocket Door Mortise KEY locks
